Nairobi, Kenya Africa

Dear Nick:

Thank you for remembering me with a beautiful card, letter, and the reprint. I have shown the illustrations to many and they are certainly good for laughs. I would like to see some enlargements made of these showing that the women have been liberated before our time (Man The Primeval Savage).

I do hope that some sort of a symposium will eventually materialize. I did receive a publication and a review by Debbie Seitzer. I would certainly look forward to our being able to get together and ~~learn~~ some of the African technologies. I was disappointed that we didn't get together this Spring, but perhaps another opportunity will come in the future.

I just received word from Marie Wormington that Richard Leakey is in a London hospital with problems with his kidneys with the possibility of a transplant from his brother. I do hope that by the time you have received this he has had complete recovery.

If Desmond Clark is with you, give him my best. He is a person I have long admired. Well, Nick, I do hope that things materialize in the Spring and we will be able to get together in Sweden.

With kindest regards,

Don Crabtree, D. Sc.
Research Associate in
Prehistoric Technology
