Mr. Don Crabtree
c/o Idaho State University Museum
Pocatello, Idaho
U.S.A.

Dear Don,

I certainly enjoyed meeting and talking with you and your wife at the SAA meetings in Reno. I learned quite a bit just from our brief chats. I also appreciate you showing us your film; and I'll be looking forward to seeing the whole production when you complete it. Be sure to let us know when it is complete.

I had mentioned that I would send you a copy of the San José paper I gave at the meetings. We had some copies made, and I am enclosing one. Also, I'm enclosing a xerox copy of John Witthoft's article regarding the Human Factor in Flint Technology. Mayer-Oakes said that he would write you in a few days regarding some other matters and would enclose the full reference to the article then.

Give your wife my regards.

Sincerely,

Joan B. Townsend
