Dept. of Anthropology
Peabody Museum
Cambridge, Mass. 02138

Dear Ruth:

Please excuse my tardy reply to your letter of June 18th, but the death of Dr. Swanson has placed extra duties on my shoulder and I am late on all correspondence. Sorry we did not get to meet in Dallas for I was informed you attended the meetings and would like to talk with you. We will be attending the meetings in Vancouver and hope to meet you there.

Regarding the paper "Some Aspects of Pressure Flaking" you have my permission to print it as is. I can see that there are many things I could elaborate on but time does not permit and think it will be acceptable as it stands.

Thank you for your excellent paper "Experimentation in the Formation of Edge Damage: A New Approach to Lithic Analysis". This is well done and I agree with its conclusions. Am enclosing a reprint of my papers on the obtuse angle and Hohokam which you may find of interest.

Will be looking forward to meeting you in Vancouver.

Sincerely yours,

Don E. Crabtree
