Monsieur CRABTREE
Lithologist
Route 1
KIMBERLY
(Idaho)
U.S.A

Dear Don,

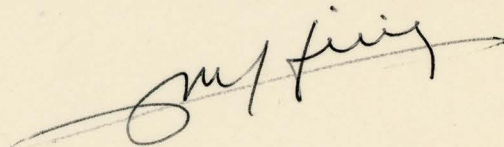

This short letter to thank you very much, more than I can say it in English, for the package of obsidan, cores, preforms and tools I received.

I'll write you a long letter by the intermediary of my friend L.C. Briggs. I want to ask you some questions...

In this little package I send you some genuine microburins from an algerian Upper Capsian site and some microburins from my experiments in 1960 which are not very good, but I'll send you some better others. I'll soon send you another bigger flint nodule from "Grand Pressigny".

Please excuse my bad language.

My kindest regards to Mrs Crabtree and to you,

J. TIXIER
