RÉP. 1

Dear Don,

What a nice package you sent me!  
I am on the point to go to Morocco, digging  
a mousterian site during a month. Before this  
travel and before writing you a long letter  
about experiments, I thank you strongly and  
sincerely. What a beautiful piece made by  
Gene Timus! Will you felicitate him?

I have got a new beautiful industrial  
glass for blade "debitage": "cristal de St Louis  
(France)", used for glass-ware. I'll send  
you some. Also made a catch with a tip  
made of reindeer antler: it is very satisfactory.

Thank you again, sincerely yours,  
Jacques.

Thank you very very much for the glass knife. It  
goes very well and it is so easy to clean it. There  
is no one till now in France! Sincerely, Juliette
