Paris, le 6 mars 1970

Please tell me frankly what I can do for you.  
 I'll send you Grand Pressigny flint but what else would you like  
 xxxxxx  
 to have ?

 Route 1, 1 etude  
 to Don's mother and sisters,  
 KIMBERLY  
 ===== IDAHO 83 341.

Your friend

Dear Don,

Don't believe I forgot the friends I have in  
 Kimberly!... It was really a busy winter for me and I got so  
 many cards from you without having time for answering!

Thank you so much for your package (especially  
 the more I see the more I want to see the more I like  
 for the preforms). I reconstructed a "punch core with its 55 blade  
 It is a good demonstration for my students. I have now to give  
 lectures on typology to about 25 graduates and undergraduates.

I understand you had a lot of fun in Mexico  
 and it was so good for me to know you enjoyed it once again.

François came at home three times and we had  
 talks about his "Cro-Magnon project". I gave him my four pages  
 proposals.

You can imagine how I am anxious to know if  
 Earl Swanson will be able to find us money from the N.S.F. (or  
 any other foundation). May we all be working together in Idaho  
 next year!

I also got the report on your beautiful "1969  
 summer flintknapping workshop". bravo! your students are happy,  
 what a privilege for them to have such a teacher!

May I have a request? Can you send me some  
 obsidian slabs, and sawed preformed cores for crutch pressure?  
 I have to demonstrate in Paris University during the second  
 half of April.
