Dear Sir:

Your university has a Series on Flint Napping. What has been published either in Tebiwa or elsewhere since "Notes on Flintnapping 4", Tebiwa, Vol. 10:1, by Crabtree?

In Tebiwa, Vol. 9:1, 1966, "A Stoneworker's Approach to Analyzing and Replicating the Lindenmeier Folson" on page 6, column 1, Don Crabtree mentions faceted spheres from Algeria. However, he gives no idea of the working techniques used. I would appreciate it if you or he would provide either a brief description or copy of the necessary pages from the applicable reference. I would also appreciate a picture of such a sphere, if available, and information as to their size.

I will pay reasonable costs of having the material reproduced.

I can presently knapp most anything else other than spheres.

Yours truly,

Mitchell White
