

Dearest Don,

first of all I want to thank for your rather lengthy phone call the other night as it surely added loads of information as to what you are up to and what your plans are for the near future.

Don, please don't worry about writing as I can surely appreciate that particular difficulty since I as well am not able to do so.

As promised I'm also sending a copy of the annual report from the Museum of Grand Pressigny and as I did not notice a copy of a livre de beurre I thought you would be interested in the blades depicted on one of the pages. I don't know how good your French is but perhaps in Idaho you may find someone that is able to translate the articles for you.

I'm also looking forward to receiving a copy of that new Folsom site that is now being dug in your area especially since you said that it looks as if it is bigger than the Linden meier site. I do look forward to that article and hopefully you will obtain it before too long.

While on the subject the person who does my writing for me brought one of the issues of the National Geographic Magazine and pointed out that article to which you referred. I am familiar with the article as someone else already has sent me a photo copy of it but not having had a chance to read I was unaware of the mention of your name in it. In any case they could have written more about you especially in view of all that you have done in that particular field.

That's about it Don, so do take care and let me hear from you again before too long.

Very kind regards

George
