Dr. Larry D. Agenbroad
Chadron State College
Chadron, Nebraska 69337

Dear Larry:

Congratulations on the N.S.F. grant. I understand it is long overdue for a most important site. The association of the quarry site, workshop and kill site sound more than promising. The potential is unique and possibilities unlimited of following all of the technological problems from the quarry to the distressed bison. Last evening I talked with Pete Volk and he said Marie has given glowing reports of your work and its archaeological significance.

Larry you don't need to give me further enticement to visit the site. I am most anxious and will look forward to seeing you the latter part of July or the first of August. I have a flint-knapping school for thirty days from June 11th to July 11th. So will have to make my visit after that and will let you set the time. It has been some time since I have been to a dig - the last being Marray Springs at least three years ago with Vance Haynes.

I am sorry that an unfortunate accident prevented me from attending the San Francisco meetings and seeing you there. This also accounts for my tardy reply to your kind offer.

At your convenience will you please send me a sketch of the site location and later I will give you a firm date for my visit.

Again thanks so much for the invitation.

With best wishes,

Don E. Crabtree
