Dear Don:

This is a letter of invitation-I would like to invite you to be one of the participants in a newly initiated "Great Persons" Program, sponsored by the Mari Sandoz Society. I can offer you \$500 for one or two demonstrations of stone tool technology. Each session would probably be of less than 2 hours duration--or a couple of sessions of 1 hour--or whatever fits your health and schedule. I would greatly appreciate some "informal" time with groups, as well. Our time schedule is very flexible and can be matched to yours, if you are interested in the offer.

I just got word that EEI (Educational Expeditions International) has selected us as one of their expeditions for this summer. Also--check us out (1 picture) in the March, National Geographic.

We are perking along again now. Brett broke his foot a week ago--but went to a muzzle loaders shoot this week end so is progressing satisfactorily. Wanda, Finn and Poco are fine, although the latter had the flu right along with the rest of us.

Best regards to you and Evelyn. I hope you are feeling great and avoiding the "bug"/ Have you heard from the Explorers yet?

Sincerely,

Larry

Larry D. Agenbroad
