

2/18/78

Dear Don -

Sorry for the delayed response - I was knocked out for 5 days on my return, by some bug I got in Idaho. ours are frozen, but I got a real healthy one over there.

Wanted to thank you again for the fine visit, lunch and your time. I've enclosed some reference mtl for you and an extra elephant book for Gene & David.

Just barely got in here Sunday night due to storm. They had already told us we would have to return to Denver. Had minimum conditions.

Steve sent the finished plates of the Hudson-Meng projectile points, so here are a couple of copies. The final draft typing should begin next week. I will sorely miss the 5 days I was laid up this week.

Best of health & warm wishes.

Harry
