

1 April 1965

Mr. Don E. Crabtree
Route L
Kimberly, Idaho

Dear Mr. Crabtree:

I have yours of March 25 with its request for some Harrison County Indiana flint.

I am crating and shipping to Dr. Clark either Monday or Tuesday, 3 or 4 nodules (depending on size), via motor. Unfortunately the large quantity of French flint was used and given away several years ago leaving only a small sample.

You might advise Clark of our continued interest in chipping technics, and that we are interested in obtaining a copy of the film for teaching purposes. We still have the old 8mm film (by Shetrone) of the Brandon flint knapping.

Sincerely,

Ray Baby
