Dear Alice:

So nice to hear from you and learn that you and Tom Hester are again in touch. Since you were both working on the same thing I asked Tom to write to you never knowing that you were old friends. He writes that he will be leaving Berkeley in July for the New Univ. in San Antonio. I didn't even know they had a Texas University there. Hope it will be a good place for Tom for he has so much to offer the profession.

When you have finished your research if you have any specimens to spare would certainly welcome them for my type collections. In the meantime do not trouble to send them for inspection as my schedule will mean I will be out of time quite a bit in the coming months and would not want you to have them in the mail during this time.

Keep up the good work and hope you will achieve you Ph.D. this or next year.

With kindest personal regards,

Don E. Cabtree
