Mr. Rob Bonnicksen
Archaeological Survey of Canada
National Museum of Man
Ottawa, Ontario, Canada

Dear Rob:

Congratulations on the Main appointment with Dave Sanger. Considering his enthusiasm and interest in lithics, you should have a pleasant and productive position.

I have had a very busy but rewarding summer - an excellent group of students at the school and the resolving of many new and interesting techniques. Saw Don Abbott last week in Victoria at the new archives building and was able to study collections and view the new museum.

I would be delighted to consider attending the conference in Calgary if I knew more about it. I have several commitments - one in Chicago - but, so far, have no definite dates on the meet there. Hope the time will not conflict with Calgary.

Thanks for sending the copy of Tixier's letter but I do not read French. Is he or is he not coming to Calgary? I just received a package of flint he sent from Sengal but his note did not mention Calgary. Are Francois and Denise coming? Also, is there any travel money for the session? As you know, I.S.U. is limited on funds. Let me have the dates and answers to the above questions and then I can give you an affirmative or negative reply.

I am delighted to learn of your continued interest in lithics and learn that you received your doctorate. Also glad to know you received your grant which I referred and okayed.

Am up to my neck with back correspondence so will close for now and await your reply.

Best regards

Don E. Crabtree
