Orono, Maine 04473

Dear Rob:

Thanks for the invitation to serve as a discussant in the session "Experimental Lithic Technology: Method and Theory" AND also the telegram confirming expenses.

This will be a welcome opportunity to get together and compare the advancements in lithics since we last had the opportunity to collaborate. It will also be enlightening and a pleasure to again compare notes with Jacques Tixier. I just received his card from Jordan and he was enroute to Paris and preparing for the conference. He also sent samples of flint from Sengal. I am sure you will enjoy working with Jacques. Am making some notes on the future potential of technological and experimental archaeology for this session.

We plan to make reservations at the Avondale Motor Inn, 2231 Trail N.W. and hope you can arrange to have Tixier lodge at the same place.

All of us at I.S.U. are looking forward to this opportunity to attend this conference and particularly me as it has been some time since I have attended any of the meetings. However, I do plan to be in Dallas in May.

Will see you soon.

Kindest personal regards,

Don E. Crabtree
