Dear Rob:

Thank you so very much for a magnificent publication. This will long be a reference book for the profession. You are certainly to be commended for publishing such an outstanding volume.

I hope you get a chance to break a few rocks occasionally. There are still so many frontiers to conquer that it is doubtful whether all technologies will ever be resolved. Gene Titmus and I are still carrying on and we had a short symposium of the students at Washington State University directed by Jeff Flenniken. It was a real pleasure.

I just got a card from Vicki Clay stating that she is now at Orono. Give her my love as she is a great student and I am sure she will do well. By the way, I taught a course this fall at Lethbridge and had one of your former students by the name of Tracy Nemeth. She was a very good knapper.

I have a friend in Friendship, Maine, an industrial engineer, doing some research on heat treatment. He said he occasionally gets to the University of Maine and will look you up. He is a very knowledgeable person who I am sure you will enjoy.

Thanks again for the superb volume, and I hope you have a prosperous and happy new year.

Your friend,

Don Crabtree, D. Sc.
Research Associate in
Prehistoric Technology
