Dr. L. Cabot Briggs
66 Beacon Street
Boston 8, Mass

Dear Dr. Briggs:

Thank you very much for the translation of Tixier's letter and for sending the article on the Polyhedral cores and blades. I do appreciate this translation, for I speak no French and must take the letters to our local High School for interpretation. Tixier is, indeed, a very fine person and I feel fortunate to have made his acquaintance. His pressure flaking is coming along very nicely and I feel he will contribute much to this field.

Just returned to Berkeley where I had a very rewarding two-weeks session with Francois Bordes, who is also making rapid progress in the field of pressure work. He tells me he will be at Harvard next February and I know you will be interested to see his work.

Thank you again for this favor and I will hope that I will have the pleasure of making your acquaintance at the Denver meet of INQUA.

Sincerely,

Don E. Crabtree

P.S. If, at any time, I can be of any help to you in the matter of flintworking techniques, please do not hesitate to write to me.

D.E.C.
