

THE AMERICAN MUSEUM OF NATURAL HISTORY
CENTRAL PARK WEST AT 79th STREET
NEW YORK 24, N. Y.

March 8 67

Dear Don

The little sample
of New Zealand *Bridian*
is not a museum specimen
so can be used any way you
wish. As there seem to be
real differences in the way
Bridian works thought it
might be of interest from
that standpoint

If anyone ever wants to
borrow the stemmed & fluted points
to make casts they will be available
at any time

Greeling's
Junius

(BIRD)
