Dr. Junius Bird
American Museum of Natural History
Central Park West at 79th St.,
New York, N.Y. 10024

Dear Junius:

This letter is written hurriedly, for I am expecting Swanson to arrive and am also preparing for the arrival of Jacques Tixier at 7 AM tomorrow - lots to do. However, wanted to get this paper to you.

Under separate cover, am returning your collection and my replicas produced during the experiment. List attached to the enclosed text will explain the replicas.

Will be glad to get your comments and corrections to this paper. If you feel it is worthwhile, you may publish any part or all of it. If you would like, we could make this a joint paper, as Bordes and I did on the Corbiac paper. I did a paper similar to this then sent it to Bordes, he added cultural aspects, deleted an "I" here and there and we made it a joint paper. I would be very honored to collaborate with you on this. If you don't want this for your own publication, I am sure either Swanson would like it for Tebiwa or Science would like something of this nature as a follow up on the article Davey and I did.

Hoping to see you and Dick in the near future - and "on the run", I remain,

Yours sincerely

Don E. Crabtree
