

The house and lot - maybe 2/3 acre --- 1 story ~~stone~~ <sup>concrete</sup> slabbed 4 section house of  
sawdellwood & lathens, painted (looks like it'd blow right out of its small nest of  
"willow trees when the vicious NW winds blow over the surrounding naked farms that extend  
for miles in every direction in this spot identified <sup>in</sup> the <sup>Twin Falls</sup> phone book as Don E. Lubbe's  
home in Kimberly, Idaho ~~is~~ with the address of "East of town" or "E. of Twin Falls".

Evelyn was musical, poetic (rather like Jean Crawford in some pictures though a smaller  
featured face) she was quick at math, business, and excellent @ P.R. brought out Don's  
thoughts and "pointed" for him when in co. of others  
(Beard because of hazards of shaving)

Helen Anderson (Don's sister) Mrs. ~~Jefferson~~ <sup>Jefferson</sup> Anderson

lost a <sup>Jefferson</sup> Albinus rock chuck

Remembered "earliest activities" of Don as "disappearing" from farm up into the canyon  
bringing skeletons back fr. graveyard, plant chips, fossils, small goats, eagles (Golden), marmot  
(flea lice), shooting surgeon! "grave robbing" led to an "interview by the sheriff". I've known every sort of  
crime there <sup>except one</sup> -- <sup>and perhaps upon me</sup> <sup>except</sup> -- the one is a ghost. Assembly of skeletons & learning  
names of the bones <sup>coll'n of arrowheads from salmon</sup> followed by rifling out bones, chips from the  
river gravel led to expectation of finding arrowheads imbedded in mastodon bones etc.  
a relic between man and fossil animals, Dynamiting fish. Finding fossil bones in clefts in  
canyon walls that are unreachible and closed at top. How did they get there?

Snake Canyon, fish hatcheries (Rimston) 20 tons/day from 1! (Total of Area? =
