

Route 1
Kimberly, Idaho

August 20, 1966

Miss Ruth Dee Simpson
840 Fairfield Circle
Pasadena, California

Dear Dee:

Thank you for your very nice letter of August 12th and I am so glad to learn that you will be passing through Idaho.

I wish I could set a definite meeting place with you, but will know nothing for sure until Swanson returns from the Field on August 28th. I think it is quite possible that I will be in Pocatello at that time doing some film work for NSF. If so, I would certainly like to have you visit the studio and see some of the films and give me your advice.

If I am not there, I will be at home writing and would love to have you stop by. My home is located two and a half miles East of the Cemetery Corner on Highway 30, south side of the road. A small brown house with lots of trees - and I have a rural box outside with my name on it - so don't think you can miss it.

I am so happy to hear that the Nat'l Geo. Society renewed the project for another year and know that you and the crew are very happy about this. We were so sorry not to see you in Reno, but understand your reasons for not attending.

Just returned from a three state tour of visiting digs and saw some wonderful material. Went to Grasshopper with Bill Longacre, Vernon with Dr. Paul Martin, Albuquerque with Cynthia Irwin-Williams and with Wormington out of Kersey, Colo. Missed Joe Ben's dig, but just did not have more time. Had a chance to skin a bear at Grasshopper with all stone tools and it works better than steel.

Do hope we will see you either here or at Pocatello. Know Swanson will be delighted to visit with you also.

Sincerely,

Don E. Crabtree.
