Mr. Donald Crabtree  
Route #1  
Kimberly, Idaho

Dear Don:

Dr. Leakey was most pleased and hopeful about the material he was shown when he visited our site. Since then, he has summoned me to Washington to present the report of the work to the National Geographic Society. Our grant for the fall season appears to be assured, and we look forward to making a significant contribution at that time.

Meanwhile, our present field season will continue until mid-May. I am hoping that your tentative plans to return in early April will work out. There is much to do and you would certainly be a tremendous help. Come any time you can, and of course, plan on sharing commissary.

Artifacts have continued to appear as the depth increases, especially good flakes.

Yours sincerely,

*Ruth Simpson mp*
