March 1, 1972

Dear Francois:

A hurried note to answer your letter of Feb. 10th. Evelyn and I have been on vacation in Nevada and California and just returned last week. It was good to get in the sunshine again and visit some of our friends. We also came back with a V.W. Adventurer Camper - something you don't have in Europe - and are very pleased with it. Now maybe we can take advantage of some of the wilderness areas of Idaho this Summer.

We would very much like to have you visit us in April and will hope the weather is warmer. However - - - Guy Muto and Jeff Maguer have been putting the pressure on me from Pullman and want to hold a symposium there with you. I have told them I would come and hoped that you would.

Now what I wonder is - could we meet at Pullman and kill two birds with one stone. They have lots of obsidian there plus other materials and now have a workshop lab and so we could work together there just as well as here. Of course, this is up to you and I know your thinking on Pullman but am obliged to ask and would love to do another workshop with you. I believe you will be hearing from them soon in this regard. I know you are busy but let me know what your decision is so I will know whether I will see you here or there.

Please give our best to Denise and your family and will be looking forward to seeing you either here or there.

Your friend,

Don

I am not sure, but it is possible that Marie will be at Pullman the same time we are invited.
