Dear Francois:

Just received your letter of March 8th and am so happy to learn that you will consider going to Pullman. Called Guy Muto and Henry Irwin and they are delighted at the prospect. Say they plan to have a scientist from England there and think you will enjoy him very much.

I know you will hear from them and that they will keep me advised of dates, etc. but as of now will plan to be there on the 9th of April to meet you when you arrive.

I am bringing some obsidian and other material with me as they are a little short up there right now. So we will have plenty of material. We will try to get some time together in the lab. Just you and me and Guy and do some experimenting.

Have been trying several new experiments which we will try together. Have some new material from Arkansas which works great and I want you to try it.

Have to leave for Pocatello so will make this short and be looking forward to seeing you at Pullman. If there are any change in plans, please let me know.

Your friend,

Don
