Dear Francois:

It was so good to hear from you and know that you and Denise are in good health. I am making a slow recovery and am now trying to do a little light pressure flaking to relieve the collapsed lung. I do hope that you will be able to attend the conference in Chicago next spring. I have fond hopes that we will be able to go to Europe next spring, but will just have to wait and see how things develop. I am only sorry that you don't have more time to work on your skill of working flint. Your problem is that you have too many skills. I envy you, and particularly your writing, it is like you were talking to me and without the use of a computer as so many resort to now. It was good to get a letter from Bruce Bradley a short time ago. I guess that he is doing well. I will close for now and hope that I can find time to do some more work on the Danish blades.

Your friends,

DEC/wdk
