Dear Don and Evelyn,

First, if I have not already done it (I am a little confused just now, with reports to write etc), all best wishes for both of you for 1973!

I have received your letter of Jan. 9, and also Don's paper, which certainly will be very useful to students. Many thanks!

I still hope to see you in France this year. Let me know, so I will accumulate some flint to ~~xxx~~ break!

-Here, nothing very new. Work, and most of it not very interesting mailly papers. I have not knapped a flake since last September! However, I find the time to write some scientific papers, and even a SF short story. But not enough time!

I hope your health will quickly improve, so you can make it to Europe. I would be so glad to see you again here!

Bien amicalement,

F. Bordes
