POSTE 334

TALENCE, le December 16th, 1973

Dear Don and Evelyn,

Just a few words to tell you I have received your letter of Dec.10. I have too much to do just now to write a long letter. I have to take on sundays for my mail!

A pity about the trailer! It was nice.

I hope 1974 will be a better year for you. It is possible that I can come to the States next summer in September, and if this happen, I shall certainly come for some days in Idaho with the Crabtrees! But before that I have to go to Australia next May. I am invited to a symposium, with the possibility to travel inside Australia to see collections of tools, and may be some Abos. It is too good an opportunity to miss!

I am currently sorting the results of my excavations at Pech de l'Azé IV. One layer is strange: many Levallois flakes and cores, some of them no larger than one inch! And perfectly typical!. I wonder what they could use them for!

I hope you have a nice Xmas time, and a happy and healthy new Year!

Bien amicalement,

F. Bordes

P.S. What became your Anderson niece? Is she still studying anthropology?
