TALENCE, LE December 18th, 1975

Dear Don and Evelyn,

Got your card of Dec.9. Glad to hear that Don is recovering well from this terrible operation. I have had a ~~xxx~~ great time in Tucson, with Art Jelinek. It was like the old time, except that you were not there! I broke some flint with Bruce Bradley, who is now making wonderful tools, but I had a pain in the right elbow, and could not make anything really good. So I tried to flake with the left arm, and I guess I could learn fast enough. However, now my arm is all right again. The only thing ~~xxx~~ lacking is time! I have to write a new course, of a high level, about the Palaeolithic outside of Europe, and it takes a hell of a time to do it. So, between the lectures, administration, writing this course, I have not much time for ~~dx~~ research. May be next year??? But it is always next year!

Denise is very well? She is now Director of research at the National Center for scientific research, which is the highest you can get in the scientific branch of this concern.

I have had some trouble with Tixier. It is a sad story, and I hope that after some time it will settle out.

With all very best wishes for 1976! May we meet again, either in Idaho or elsewhere.

Bien amicalement,

F. Bordes
