Dear Dr. Swanson,

I have not answered your letter of May 10 sooner, because I was in a dark about my possibilities. Trouble developed very fast these last times. It seems that the University of Montreal had its men cut short and they are no more sure they can have me this fall. It is not yet sure, however.

But, happily, I got a letter from Leakey asking me to come and see the things they have excavated in California. They could pay me the travel from France to the States. In that case, instead of having to pay my travel from Montreal to Idaho, you would have to pay from California to Idaho. Is it OK? Of course, I can give any lectures you ask for. However, as I shall be shorter on money than I thought I would be, the honoraria would have to be paid quickly enough!

Let me know as soon as you can if this can work!

Very sincerely yours,

P.S. In that last case, I would be able to be in Idaho about September 15 or 20.
