Dear Don and Evelyn,

I have received your letters and the copy of Don's work on the blades. I did not really read it yet, since I am now busy ^{with} this the end of the year reports, and we have just moved from the old lab to the new, so everything is yet a big mess. And, also, I am afraid we will have a very sad Christmas this year. My grandson is in the hospital since 3 weeks: a kind of heart sickness; the doctors are baffled about what it is, the only sure thing seems to be that he has few chances of ever recovering. He is 4 months old! Well, that is life and what can you do about it?

I heard about the Lighic conference being canceled by a letter from Marie yesterday. I hope we will find another way of meeting again. I shall explore the possibilities of having you coming back to France, too, but I cannot promise anything. I shall certainly try.

Well, I hope for you a very good new year! Give my best to your so nice family, and also to the two cats!

Bien amicalement,

F. Bordes
