Dear Don,

To day, at long last, I could begin to work on our paper. I hope to be able to send you a revised version in about 10 days.

However, there is a point on which I disagree with you, that is page 2. I did look on obsidian blades I had made last August in Carsac, and found out that the striations are not always on the two edges of the blade. Here is a drawing of the pattern I found. What do you think?

Our best to Evelyn, and all those I knew here, ~~at~~ in Idaho.
A Meow to the cats!

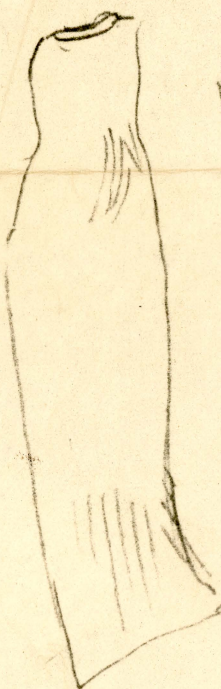

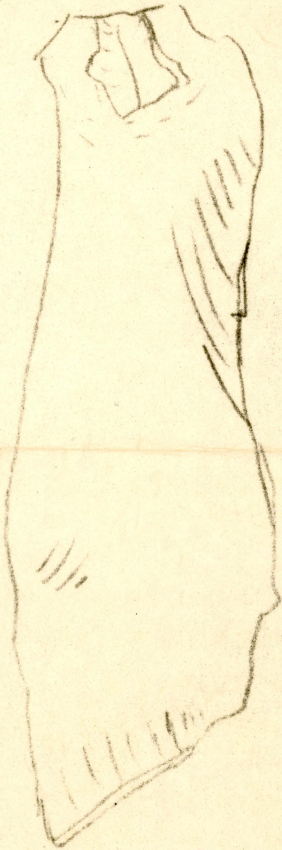

Bien amicalement,
