Dear Don,

I got your letter of March 15. Damn, I was obliged to let the joint paper to write another paper, which I had promised for ~~April~~ March 1, and had forgotten, with all my troubles. So it will be about 5 days before I can go back to our work. But then I will not let it down before I am finished with it!

I am glad you have met Tindale. I tried this australian method, and I think that if they do it that way, it is because, living on the Antipodes, they stand on their heads! Nevertheless, we have to try it. I can flake all right, but I cannot control very well. Gene should do it very well. It is not too far from his own way.

I remember now I sent you only the reprint on technology. I will send you some ~~other~~ other ones soon.

There is, may be, some slight hope of my coming back to the States in 1969. I am not at all sure. But if I can, then I surely will come to Idaho!

Bien amicalement to the Crabtrees!

P.S. I do not remember if I sent to you my Science Fiction or not (La vermine du Lion). I remember seaking to you about it. But so much did ahppen since the happy Idaho days!
