TALENCE, LB

Feb.15th, 1971

Dear Don and Evelyn,

Just a short word to ask how you fare. I have not much to say, since most of ~~myxxxx~~ (hell!) time since my last letter has been taken by red tape. January and February are bad months. Well, it is now almost over, and I hope to be able to do some work now. But it will be mainly analysis of the Corbiac stuff (I find some interesting ~~x~~ wear patterns on just broken blades).

Denise is better, but not yet her old self. It will probably take one year more.

It is possible that I may come to the States next December for a short stay, but in the East only. But Idaho is far, and in winter we would only do indoor flaking, and, for some reason, I cannot do very well indoors (except by pressure, of course).

Well, I still have some rolls of red tape. I hope you both are all right.

Bien amicalement,

F. Bordes
