

6/4/69

Dear Mr. Crabtree,

I have heard rumors around the University of Arizona, Anthropology Department that you are going to have some type of field session in lithic technology this summer. I would greatly appreciate any information you could send me concerning when, where, possibility of participation etc. When Professor Bordes was at the University I was very fortunate to work with him and I learned a great deal. I am very interested in lithic technology of all types and I am sure I could learn a great deal more.

Sincerely,
Bruce Bradley
