Mr. Bruce Bradley  
Dept. of Anthropology  
Southern Methodist University  
Dallas, Texas 75275

Dear Bruce:

It was so nice to receive your letter and learn of your current activities. Looks as if you have been mighty busy this year. My work in lithics keeps snowballing and I just can't keep current with correspondence but have found time to complete a couple of papers. Just finished the one on pressure flaking for Wilmsen and have another in the mill.

I am sorry we missed you in Tucson this year. Called Betty and hoped you would be home on Semester break. Had a nice visit with your mother and learned of your department changes and your work. Also had a nice visit with the people at the University and was allowed to study the Murray Springs material. Also visited at Tempe and with Al Goodyear and saw many collections.

I am disappointed that Joel did not get the grant for functional experiments. It is certainly a part of the lithic field which needs exploring. Actual functional experiments and studies would certainly add to our meager knowledge of tool types and their uses.

I do not plan to go to the meetings in May. Just too darn expensive. But I hope we can get together this summer. I have several commitments cut the only firm one is the field school and the acceptance of a \$1500.00 scholarship for my student at Forest Grove, Oregon on August the 9th. Hope after that I can visit the Ozette site. Our school will be from June 15th to July 15th and hope you can come by and pay us a visit. You are always welcome.

I understand from Marie Wormington that George's site in Wyo holds great promise of a Folsom breakthrough. Hope we can get there this summer. Hope that your film contract works out well. Sounds great. Just had a letter from Dick Gound and he says he will see Francois in Canberra in May. Francois also writes that he will visit us in Kimberly in Sept. Hope so.

Do have a good summer, Bruce, and get by and see us if you can.

With best wishes,

Don E. Crabtree

Give our regards to Joel and our congratulations to Fred on his promotion.
