Dr. Alan Bryan  
University of Alberta  
Department of Anthropology  
Edmonton, Alberta, Canada

Dear Alan and Ruth:

Thank you so much for your excellent publication in Current Anthropology. I am sending you some copies of the Technological description of the artifacts. I hope you will receive them, as I am not quite sure where to send them for I know you are on Sabbatical and only have the Huston, Texas postmark. You sure do get around and am certain you are making the most of your leave.

We certainly agree that Mexico is a great place and hope to be there during the month of December. We have had a hectic year and are sadly in need of a vacation and have not had a chance to get South of the Border in four years - so I think it is time.

This past summer I held a thirty day school on flaking techniques and was delighted with the results. Apparently so was NSF for there is now a great clamor to repeat the school next year and having the students of 1969 return to lend a hand with the teaching. Will be looking forward to it if the money comes thru.

We envy you your Sabbatical leave - will you get to Lima for the congress. Would love to so, but right now am hoping we can make the meetings in Mexico City.

Had a nice but much too brief visit with David Lubbell when he stopped on his way to Edmonton. Hope to have more time with him.

Hope you find some exciting sites while on leave. Rosa Fung wrote and sent some lithic specimens from the Chivateros digging of Drs. Josefina Ramos de Cos and Donald A butler which were very interesting. Maybe you can get to this site.

Please drop us a note if and when you have the time.

Your friends,

Don and Evelyn
