Greetings for Christmas  
and Best Wishes  
for the New Year

Ruth + Alan + Clyde

Dear Don + Evelyn,

-25° F here today, in the wake of a snowless blizzard, I gather that the low bringing the Arctic air down to us passed your way.

Presume you had a delightful time looking at the sites around Les Eggs, tho I imagine the weather wasn't as good as when we were there. Have just run thru the class sequence in my introductory class, + passed the Crabtree facts around.

A report on the Brown Bench site, now formally known as the Dean site, by Paul L. Barnes, has just been published by WSU (Laboratory of Anthropology, Report of Investigations no. 25). Make Daugherty send you a copy.

  
Hallmark
