Casper, Wyoming 82602

Dear Leon:

Thank you so much for the magnificent pictures. They are really the first that I have had as someone else is usually taking them and I never have a chance to get close-ups of the actual flintwork. I shall always prize these pictures and I don't know how to thank you enough for them.

We did enjoy our visit with you and the Wyoming Society for Archaeology. I was treated royally and did enjoy meeting so many interesting people with so much contagious enthusiasm. You really have a great club and I would look forward to attending again.

I understand that George Frison is making some spectacular finds at his folsom site. Everyone there had such a good time and we again enjoyed ^{our} ~~are~~ visit in Casper as well as our lithic technology session.

I am sorry that illness has prevented answering your letter sooner and I do ask for your forgiveness.

With kindest personal regards,

Don Crabtree
Research Associate in Prehistoric Technology
