Dr. John Cornell
Program Director for Anthropology
National Science Foundation
Washington, D.C. 20550

Dear Dr. Cornell:

No other financial support has been sought for the proposal, Experimental Prehistory, which was submitted by me to the National Science Foundation. I have no plans to seek any other support.

Because the proposed camp for the Experimental Prehistory project near Twin Falls has been sold for a housing development, it will probably be necessary to hold this project at Idaho State University if funds are awarded by the National Science Foundation.

Sincerely yours,

Earl H. Swanson
Director
