CANADA.

Dear Don.

I hope you are well. I would like to take this opportunity of thanking you again for allowing me to attend your flint school at Twin Falls. It was a unique opportunity for me which I shall always remember.

What artifacts I have found mean a great deal more to me as at present I have no hands through working with pieces of stone.

I am returning to England in the new year so you should get some good English flint soon.

I meant to ask you as to how Neolithic man held such

Small round flint pebbles in
their hands when shaping
such artifacts as the ones I
showed you.

I have a box full of bits
& pieces in England ready
all waiting!

Again thank you and my
thanks & best wishes to
Dr E Swanson

Yours sincerely

I. S. Baird
Callaghan
