Mr Don E. Crabtree,
Route 1, Box 39,
Kimberly,
Idaho, 83341.

Dear Don,

Thank you very much for your letter of 15th February. I am very glad indeed that you approve of the Bordes' film. As you know, there are one or two things I would like to have had omitted but on the whole it is very good. I am told it was well received at the AAA meetings last year. Thank you for your kind offer of advice with the second film and we may well take you up on this. It is making steady if not very rapid progress. I think you will approve.

I shall be much interested to have off-prints of your Mexican polyhedral core paper and the Hohokam points in due course. I very much enjoyed your paper with Emma Lou Davis. We need much more of this kind of experiment. One thing you did not record and which I think is important is how many flakes etc. you used in the making of the peg. You certainly sound to be pretty busy - as we all are. If you can get up here for a quick visit from U.C.L.A. it will be very good to see you.

With kindest regards to you and Evelyn from us both,

Yours,
