Friday 11th October

Dear Don,

I would love you be so very kind as to look through this script for the pressure plates film the University Extension people are making and check that there are no glaring mistakes! They had been a terrible time out finally they got but Clyde Smith promises it will definitely be ready for the AAA meeting in Seattle. It looks alright to me but you are the authority and I'd be so grateful if you would look it over and advise how as soon as you can.

Some of the sound may be better but unless there are any glaring errors and must be put right to ask that we leave the script handy so it's ready to match with the action parts. I think a better film than the first one - at least I prefer it since it is concerned immediately today. I think you will be pleased under the hand. Any chance you will be in Seattle? I hope so. There is always a room here for you both when you are down this way.

We return from Africa after end of last month & are back in the throes of a new academic year. I saw the film as it

Ca. 24.71

has been presented - on the small beach + it looks very good
the same feeling comes out really.

Believe me in accordance with your letter

Yours
over

John
