Kimberly, Idaho 83341

Sept. 17, 1968

Dr. Joffre L. Coe, Director  
Research Laboratories of Anthropology  
University of North Carolina  
Chapel Hill, N.C.

Dear Joff:

Am making plans to leave Idaho on about the 7th of October to visits to Harvard, American Museum, Smithsonian and Chapel Hills. Think it will be the latter part of Oct. before I get down your way.

Am wondering if you wanted or had the honorarium for a demonstration and slide showing on lithic technology. If so, please let me know and I will send material in advance via freight for such a demonstration. The University of Maryland requested a demonstration with honorarium and have already sent them two sacks of obsidian - so should do the same for you if you have these plans.

We have indeed had another busy summer touring the Kersey site, Grasshopper and Anazasi and then had a return trip to Tucson to do some analysis for Haury. Then Swanson made a "quarry site" movie at the obsidian beds in Oregon which turned out beautifully and shows much of the preforming and bladmaking. This one will be marketed to universities and Earl has several orders already.

Had a nice card from Marie in Japan and we plan a small lithic technology conference in Tempe sometime in February. Also you will be interested to know that Bordes is coming back to my home next Spring and I am certainly looking forward to more work with him. Also Tixier will be here in either March or April to spend two weeks with me and this will be another highlight for me. Do hope that one of them will be here when we have the conference in Tempe.

Will be looking forward to seeing you sometime in Oct. and reviewing your quantity of material.

Sincerely,

Don E. Crabtree
