Dear Joffre:

Thank you so much for your letter of ~~Sept.~~ 23rd. and for the honorarium. It really helps, as the NSF grant does not cover all expenses.

We plan to leave here on the 6th of October and fly to Boston and then surface to Andover where I am looking forward to doing some work with Eyers on the Debert and Bullbrook material. Then to New York to do some work with Bird; then to Washington to work with Wilmsen and then to Chapel Hill. I wish I could give you a definite date on my arrival in North Carolina, but do not have any idea how much time I must spend at each of these places. The longest stay will be in Washington with Ed where we will be working with the Roberts collection. I imagine I will not reach Chapel Hill until sometime around the 20th, but will call you from Washington when I can give you a firm date.

Last week I sent a sack of lithic material to you and hope it has arrived by this time. I had previously sent material to Ed, and if we have any left over, I shall bring that along on the plane. At any rate I will call you and give you plenty of warning so you can make your plans.

Just finished a film here on pressure work which I think will be very good. We now have a professional cameraman and in June we did a quarry film in Oregon which is really beautiful. Hope the second one is as good.

We are really looking forward to our visit with you and the chance to see your material and do some work together.

Thank you again and will be seeing you real soon.

Sincerely,

Don E. Crabtree
