Kimberly, Idaho 83341

Dear Don:

Just a note to say that I enjoyed reading your latest article on The Cone Fracture Principle. As usual, this is a very thorough and elucidating work, which reminds me to ask if your film has been put on the market yet for distribution.

I have a young student who has become very interested in stone work and has developed quite a bit of skill considering his lack of training. Enclosed is one of his points that he had thrown away, and I recovered it from the trash can. He has requested that I write you to see if you are going to have another workshop this summer. If so, I would certainly recommend this person highly. I think he has both the interest and the skill to do a good job.

I trust both you and Evelyn are getting along fine. I may get to San Francisco in May. If so, I hope to see you there.

Cordially yours,

Joffre L. Coe
Director
