

Use of the Core Rebble  
Floke - thin & thick  
Blade

Random flaking removing irregular  
scale form or indiscriminate  
collateral flaking  
width of flokes Narrow  
Medium  
wide

The order of floke removal & Direction of force concentric waves and  
Radial lines

Parallel (Right angle)

(oblique)

Back hand or left hand

Floked from one lateral edge only.

Double oblique or herringbone

angle of section of the artifact

The thinning

Height & Step postures

Ripple flaking Height of crests & troughs

the elimination of crests & troughs

the character of the bulbs of pressure and the diffusion

Unflaked surfaces - Neg to residual technique  
Thermal treatment

PRESSURE

*w. helalser*

Use of the flake or blade as a blank

Use of the core technique on thick flake or cobble.

collateral flaking

parallel, right angle to the lateral edges

random

thinning

diagonal or oblique ~~to~~

Wide, Medium, Narrow
