

26 Replicate not simulate

If one says it could be, then illustrate by examples or if not say it may be possible. My thinking now is such and such but my change or be confirmed upon examining larger future populations of artefactual material.

There may be many approaches or parallels to simulate a technique but eventually it will be to tell if it is a true Replica, such determination is what its all about and this applies to the aboriginal as well as the experimenter.

27. Challenge of thinking hereon as opposed to the Billet
Study of percussors both stone & antler and ^{Woolly Mammoth}
at this time will include Boase Calcareum of Bison ^{error}
as found by Kelly Murphy U of T while doing a survey found
imbedded within Material a very desirable percussor tool
Mess American Co. shotgun term not polyhedral

minor ^{Technique} ~~Technique~~ can contribute provide technological
~~traits~~ traits that may be followed in time & Space
Francis Border has proven this is true in
old world ^{TYPOLOGY AND} ^{analysis} industries based on blade making and
there is little doubt that ~~parallels will be~~
revealed tool types derived from the Blades.

Continued work in Beluge by Hester, Hester and
Schaffer and others will confirm an advanced
percussive Blade Technology in the new world.

It has been richly rewarded not by money but by
my being able to have been able to meet so
many real friends and to draw on their
experiences and intellect
