

EXPERIMENTAL ARCHAEOLOGY  
DANISH BLADES

Description of the Danish blade

Enigma and elusive technique

Possibly one of several danish techniques

Compare to Jacktown and Poverty point Sites

An outgrowth of several technologies Sherataki core, Edge ground Cobble.  
Turkish and English, Corbiac

Tixier and Bordes Experiments

~~#####~~ Tools and material

Core forming

Inertia and support

Gravitational center of percussor

Size of percussor

Velocity of percussor

Angle of blow

Human reaction

Material preference

Independent developement of technique

Possible relation to percussion fluting

Blade character changes as core is reduced in size.

Distinctive preparation flakes

A preconception of end product

Single blades and large populations of blades
