Dear Don:

Sorry that I haven't written sooner. I'm extremely busy on the analysis of the lithics of La Libertad, Chiapas which will be my thesis. Hopefully I will be done the last part of October and the first part of November..

I have attempted both of the percussioon techniques that you showed me. I wanted to write them up and send you the description for correction. However, I wanted to have personal experience in the replication of the macroblades with the tiny platforms. I tried to do it as I remeber it but was unsuccessful. I guess I'm not as good at observation as I thought. Partly, the problems is that I really have not time to develop any kind of coordination of the technique. Hopefully, I can do more on it when I'm back in the states. I plan on returning the first part of november. Hopefully I will have time to come by and see you and discuss some more of the mesoamerican problems with you

I hope that you are feeling better and that everything is going well for you. I have enclosed some pictures that may be of interest to you. These are all artifacts from the La Joya quarry in Guatemala.

Hope to see you soon.

hasta entonces
