Paris le 19 Decembre 1967

Dear Mr. Crabtree:

First of all I present to you my most sincere wishes for the Holidays at the end of the year, and my tidings for a great New Year and that it will be fruitful for you and rich for us.

I have received from you in good condition the Tebiwa and thank you for this that you have done so well this interesting article. May I ask you to be responsible for sending to me the Journal. For this, I send the enclosed coupons, the value of these are to be applied for the Tebiwa.

Concerning the drawings of the prismatic cores, I am fortunate to have you speak of the details on the whole, for I am preparing a book on some of the prehistoric industries. Unfortunately an enterprise of this nature is large and I cannot entirely devote myself to this task, therefore, I am assuming the illustrations of the Paper on African typeologies.

I send my congratulations to you for completely describing and illustrating the manufacture of the Folsom point. This is the A,B,C of all the studies in prehistory. It is nonsense that no one has given talk of the prehistoric civilizations starting with what one knows perfectly well on the techniques. I am always very happy to read of you and I beg of you to send dear Mrs.Crabtree my respectful sentiments.

Michel Dauvois
